

Firm Statement

Specialties

Multi-Media Consulting Inc. (MMC) is a full service media systems design and consulting firm servicing the architectural community. MMC Inc. produces successful projects through a pragmatic approach to audiovisual system designs, offering clients a host of focused, proven and tangible programs designed to deliver maximum efficiency, minimal expense and superior results.

Experience

Richard A. Wells is the founding principal of the company and has more than two decades of experience with audiovisual system analysis and design, project management and construction administration.

Mr. Wells has consulted on more than 100 significant building projects including auditoriums, university facilities, performing arts centers, corporate headquarters, airports and municipal projects. Mr. Wells holds 4 US Patents for electro-acoustic design.

Approach

We approach every project from the perspective of service and teamwork. We specialize in contract documentation completeness, organization and clarity. We take advantage of the latest technology to coordinate documents with other members of the design team. We painstakingly coordinate the location of every device with the design team. The result is a far more collaborative experience that heightens the creative atmosphere and produces a far more efficient and elegant result. Ultimately our goal is to do our part as a member of the design team to make the owner proud of their new facility on the final walk-through.

- **MMC** is the only national firm that assures our clients will never speak with anyone other than a principal of our firm. It's our **Principal Principle™**.
- **MMC** developed and employs a multi-tiered design-check review system to ensure that the architect's design remains the guiding force for every system we design. It's our **TruDesign™ Coordination Review System**.
- **MMC** leads the industry in documentation accuracy. We developed our **CrossCheck™ Documentation Process** whose many facets result in heightened efficiency and greatly increased client satisfaction. A CSI expert has meticulously reviewed our drawings and specifications for conformance and accuracy.
- **MMC** takes real-world project management into account with our **FlexSelect™ Program**, which ensures that whenever the owner wants to make the purchase of equipment—whether it is now or later on in the build process—that timeframe is supported as an integral component of our design and documentation.
- **MMC is registered as a Small Business and a Woman Owned Business.**

Clients

MMC provides a full range of design and consultation services relating to the audiovisual systems industry and have a broad base of projects from which to draw experience. Clients are typically architects, educational institutions, arts organizations, contractors, businesses and individuals seeking the very finest advice and engineering to meet their audiovisual functional requirements.
